

2019 Technology Situations and Trend for 2020

- IBM Certificate Capstone Project

Chengxin Luo
December 2020

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Data Collection
 - APIs
 - Web Scraping
 - Public Data Resources
- Data Wrangling
 - Duplicates Handling
 - Missing Values Handling
 - Data Standardization
- Found the current situation and future trends of changing technologies
- Analyzed the correlations of different features
- Visualized data and generated Dashboards by Python and Cognos

INTRODUCTION

Situations

- Technologies are being developed rapidly
- Keep pace with changing technologies and remain competitive
 - Important and necessary to know the trend
- Stack Overflow developer surveys since 2011
 - Clear view of the developing trend of programming languages as well as databases

Our Analysis

- Current situation in 2019 and future trend in 2020
- Correlations between different features

METHODOLOGY – Data Collection

- GitHub Jobs API
 - Number of jobs currently open for various technologies
- Web Scraping
 - Programming Languages and corresponding salaries
- Open-Sourced Data
 - 2019 Stack Overflow Developer Survey

METHODOLOGY – Data Wrangling

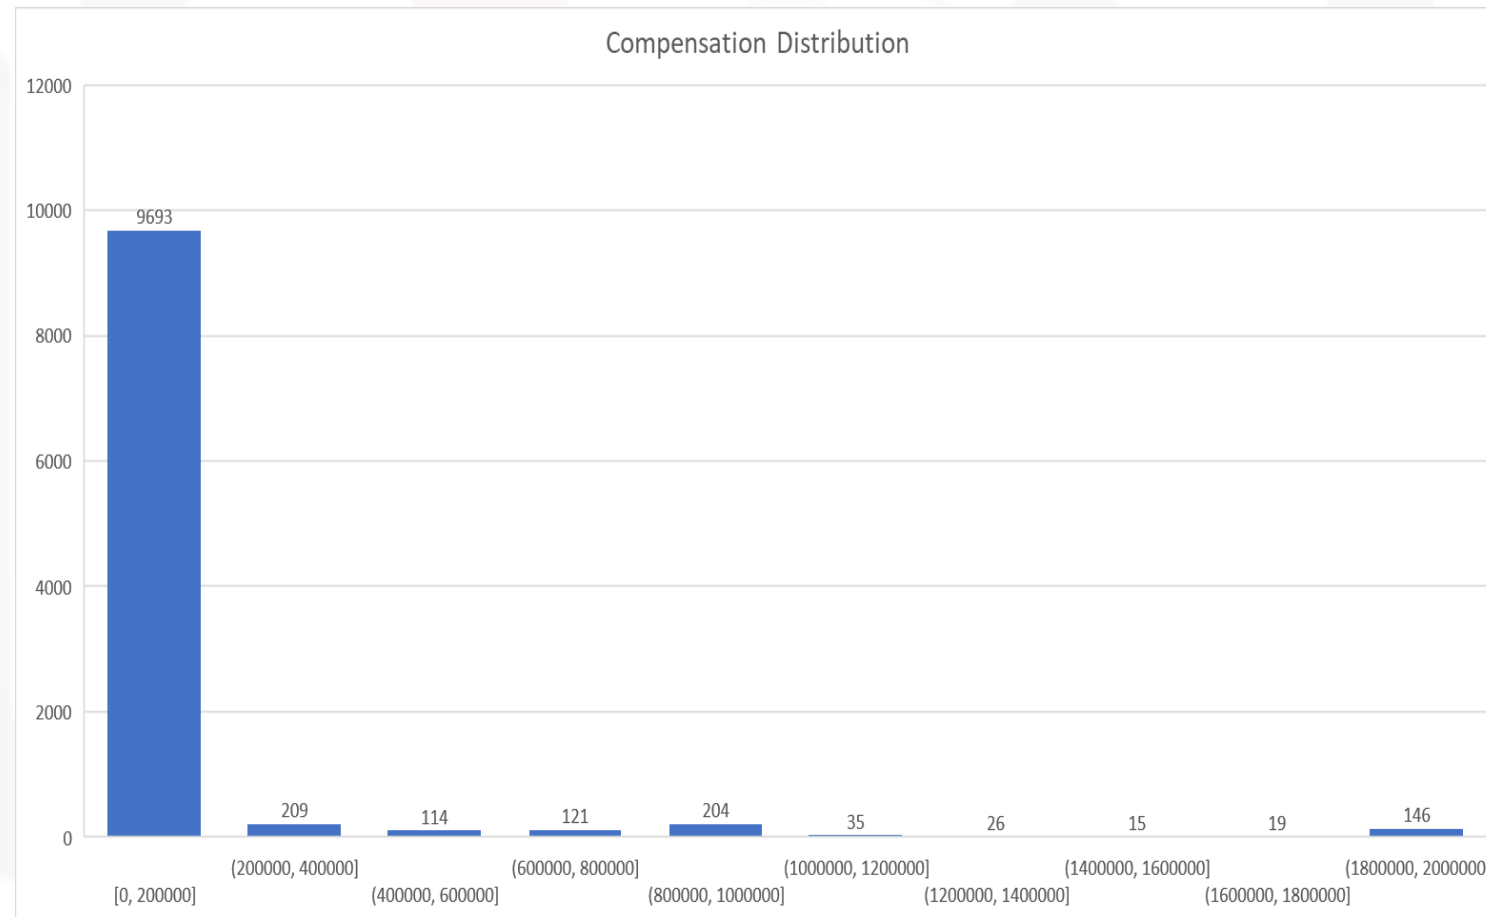

- Duplicates Handling
 - Finding and Removing
- Missing Values Handling
 - Finding and Imputing
- Data Normalization
 - E.g. Transform all the salaries (Weekly/Monthly/Yearly) to Yearly

METHODOLOGY – Exploratory Data Analysis

- Determine how data is distributed
- Identify and remove outliers
- Find the correlations between different features

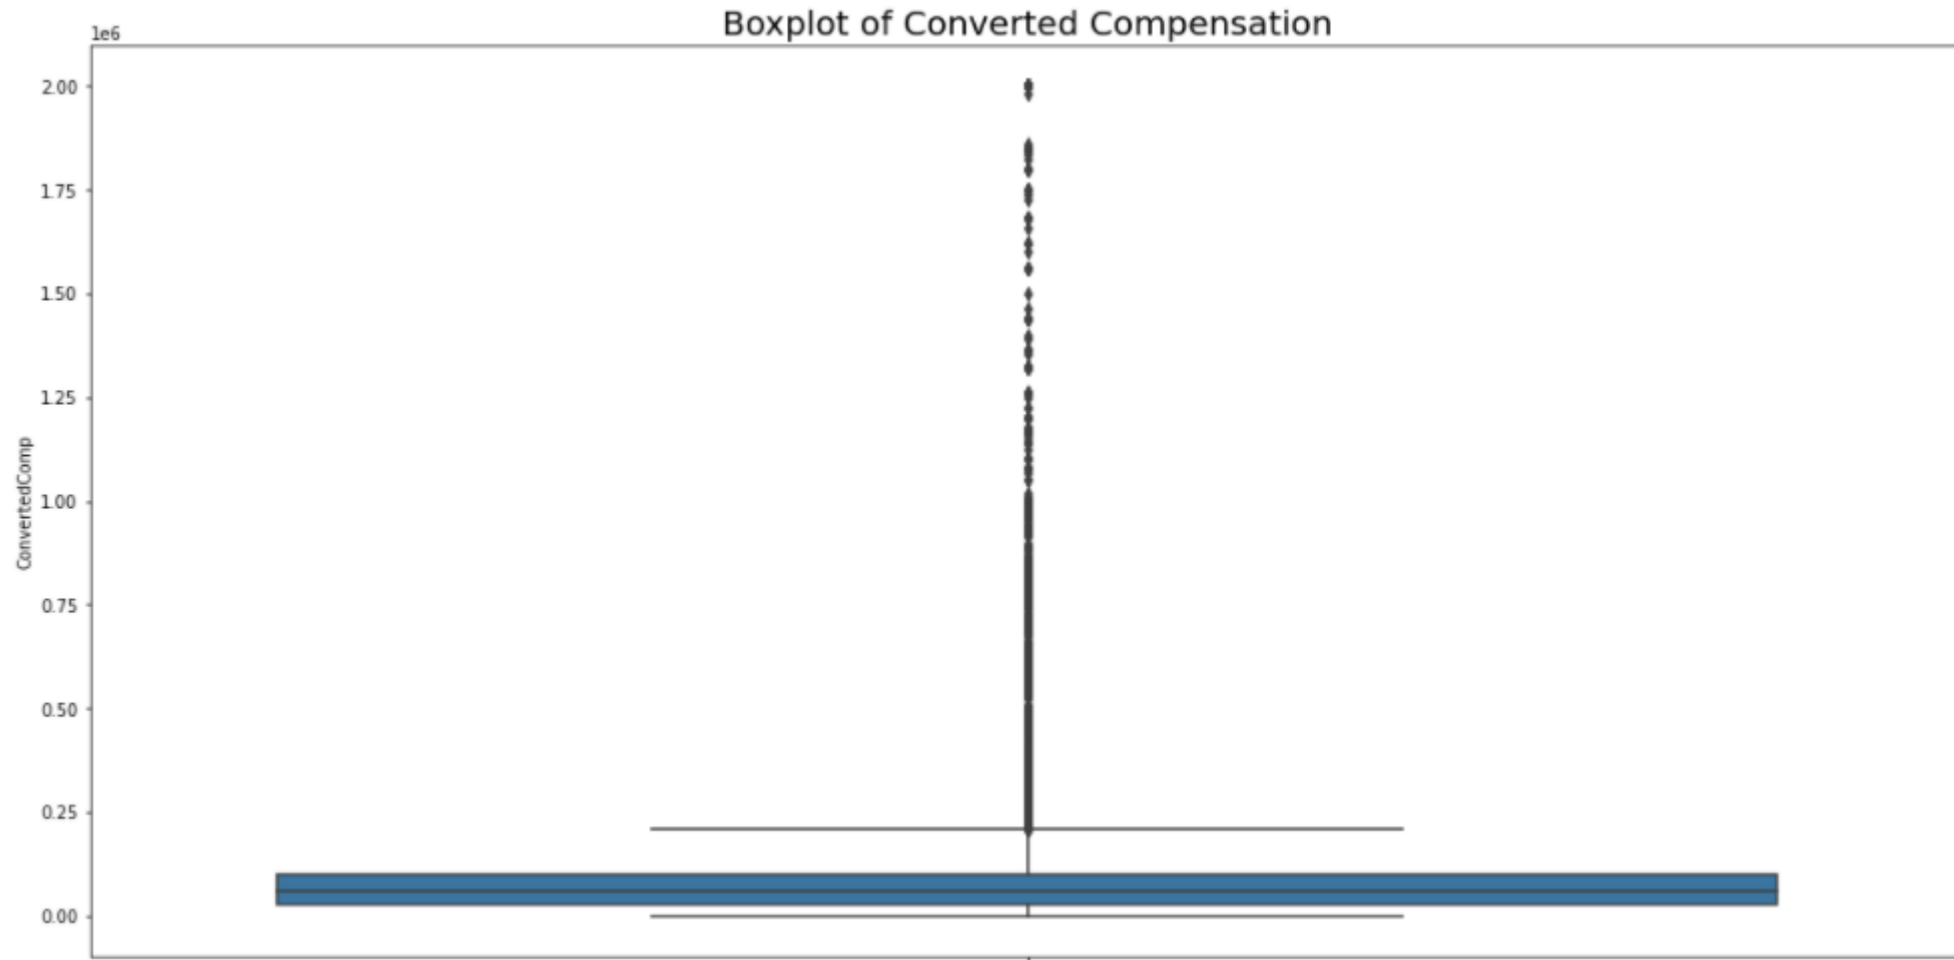

RESULTS – Distribution of Compensation

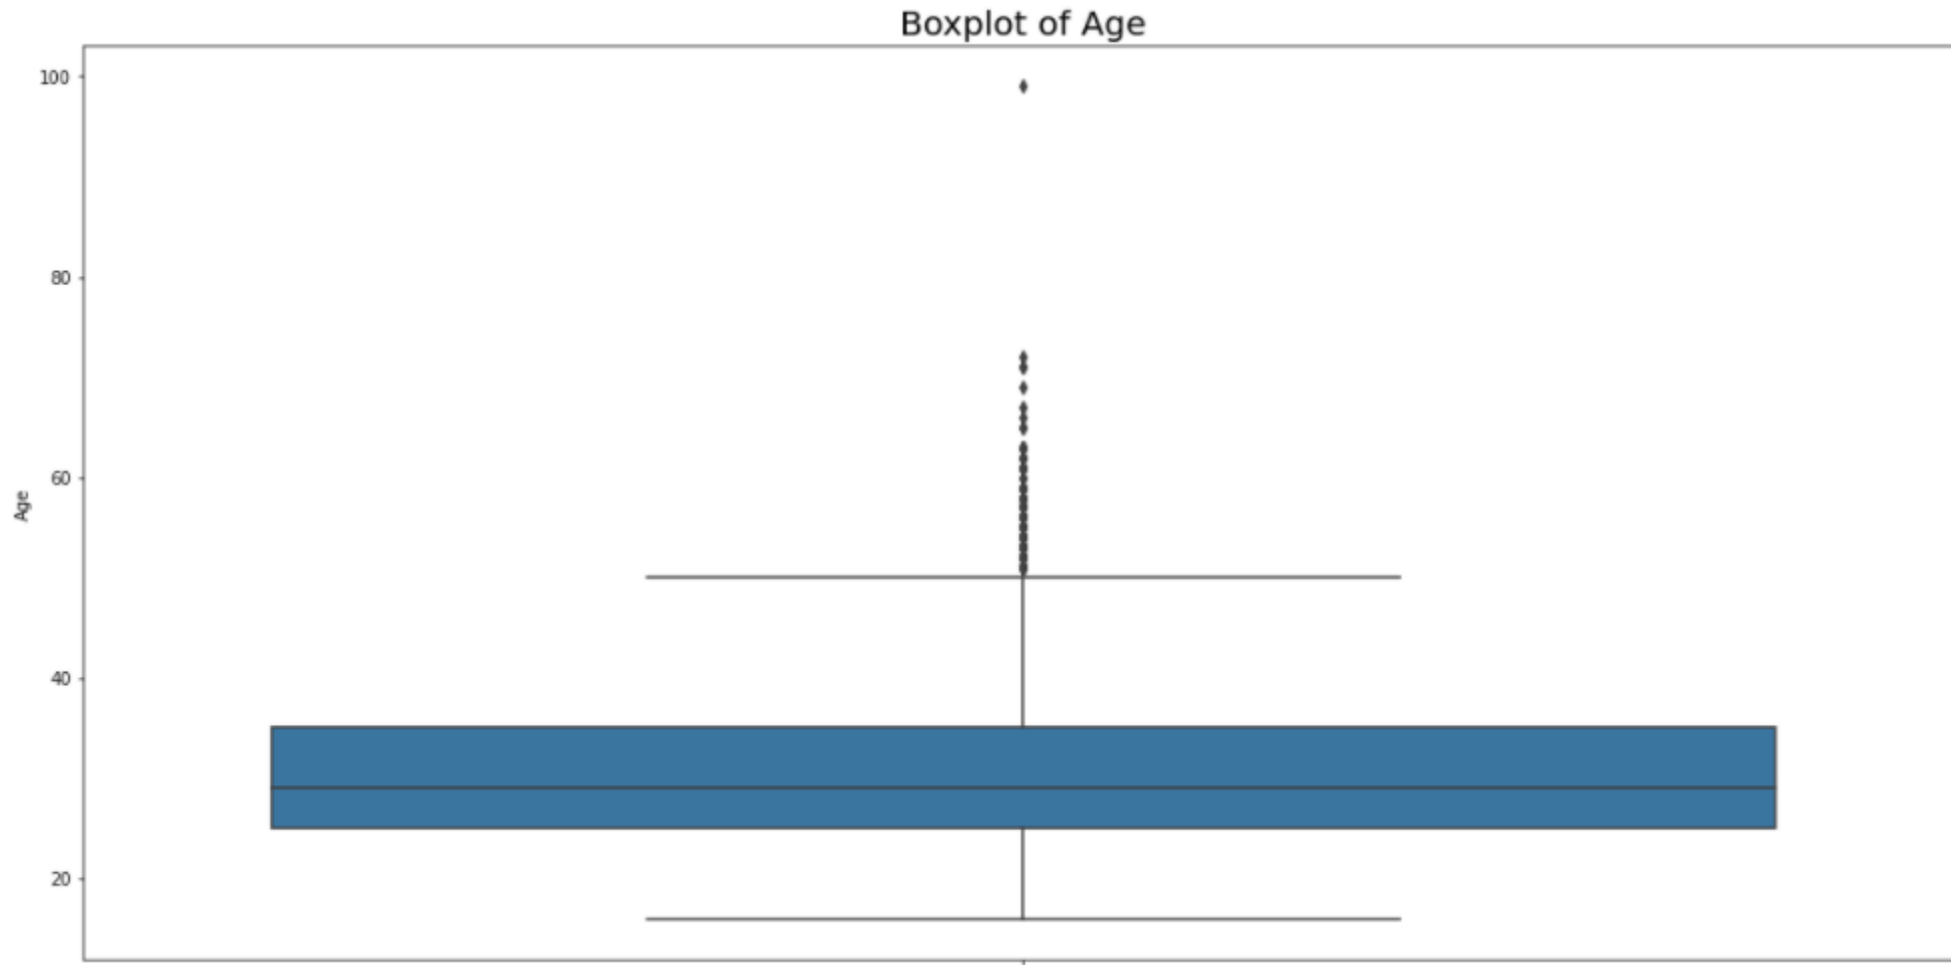

RESULTS – Distribution of Age

RESULTS – Boxplot of Compensation

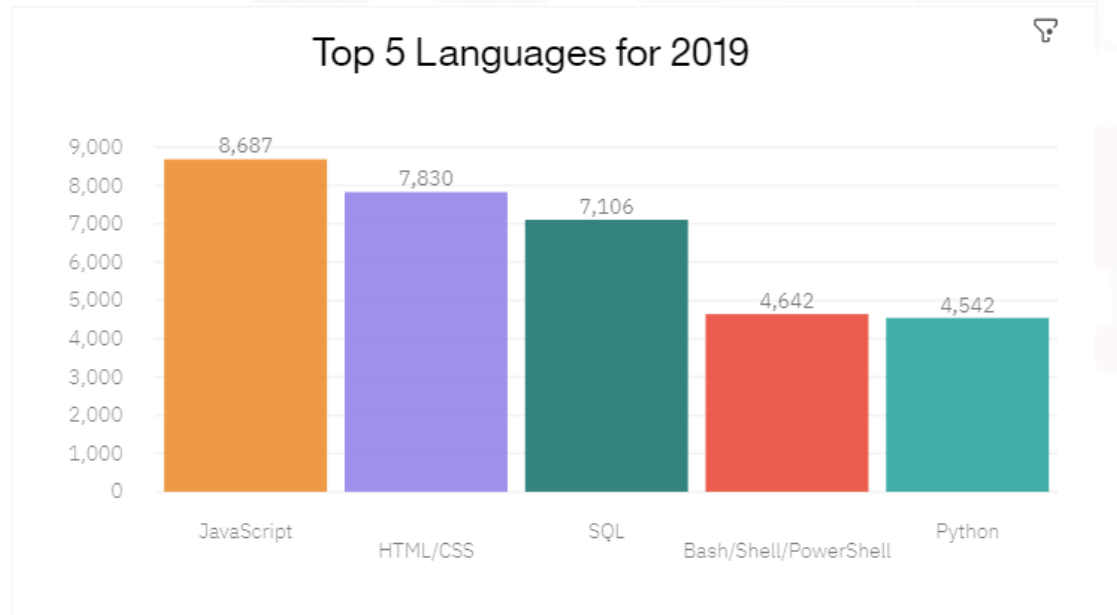

RESULTS – Boxplot of Age

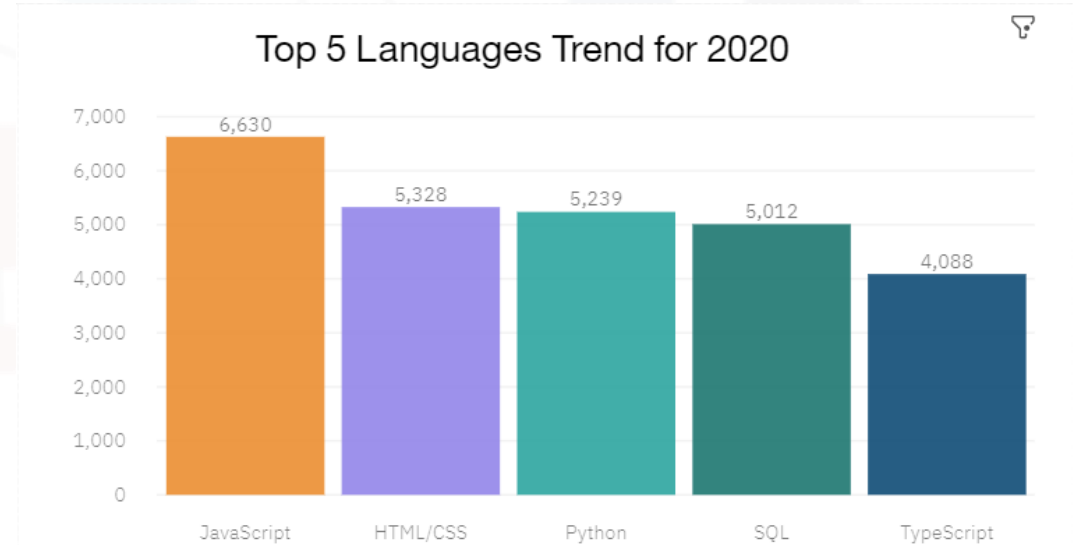

PROGRAMMING LANGUAGE TRENDS

Current Year

Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Average number of desires drops for top 5 languages
- Python remains in top 5 and desire is increased
- Typescript replaces Bash/Shell/PowerShell in top 5

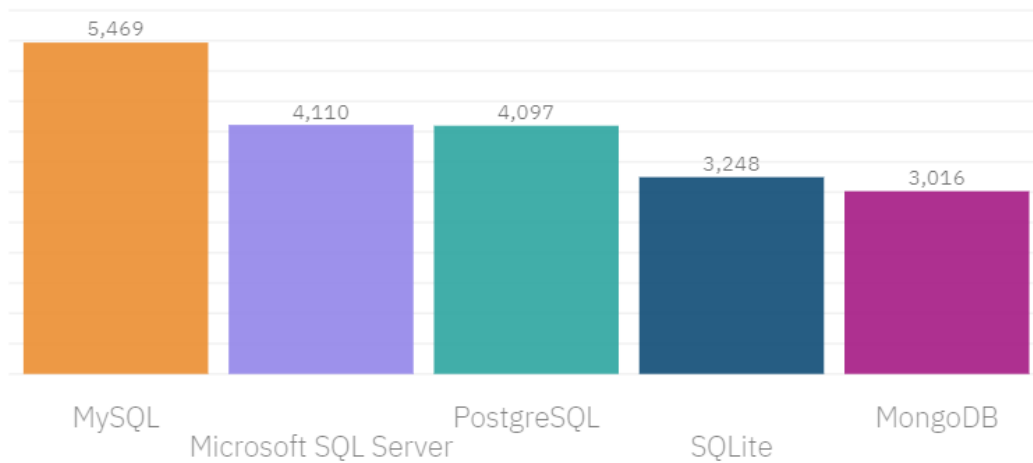

Implications

- The non-top 5 languages has the trend to occupy more shares
- Python is becoming more competitive
- The competitive power of Shell Language has a dropping trend

DATABASE TRENDS

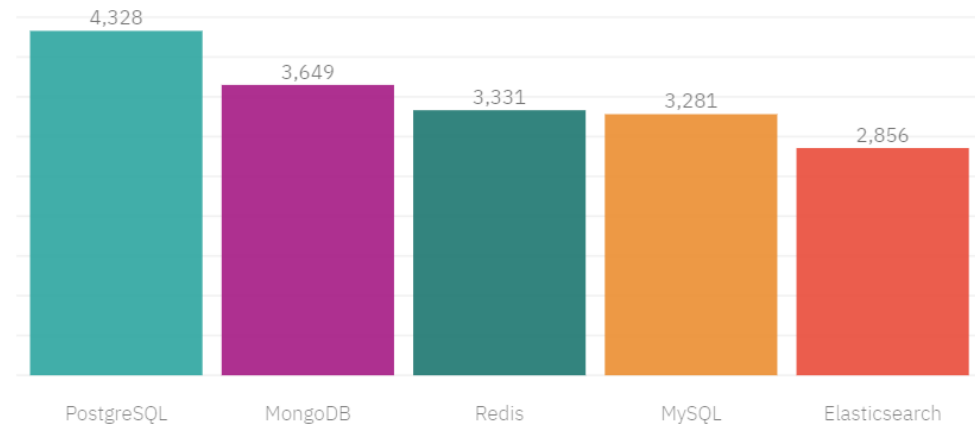

Current Year

Top 5 Database Worked With

Next Year

Top 5 Database Desired Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- SQL DB occupies 4 of top 5 in 2019 but only occupies 2 of top 5 in 2020 trend
- MySQL/PostgreSQL/Mongo DB remains top 5
- Redis and Elasticsearch step in top 5 trend

Implications

- SQL DB is losing power
- Open-sourced SQL DB is still competitive
- Cloud-based/No-SQL DB becoming more competitive

DASHBOARD

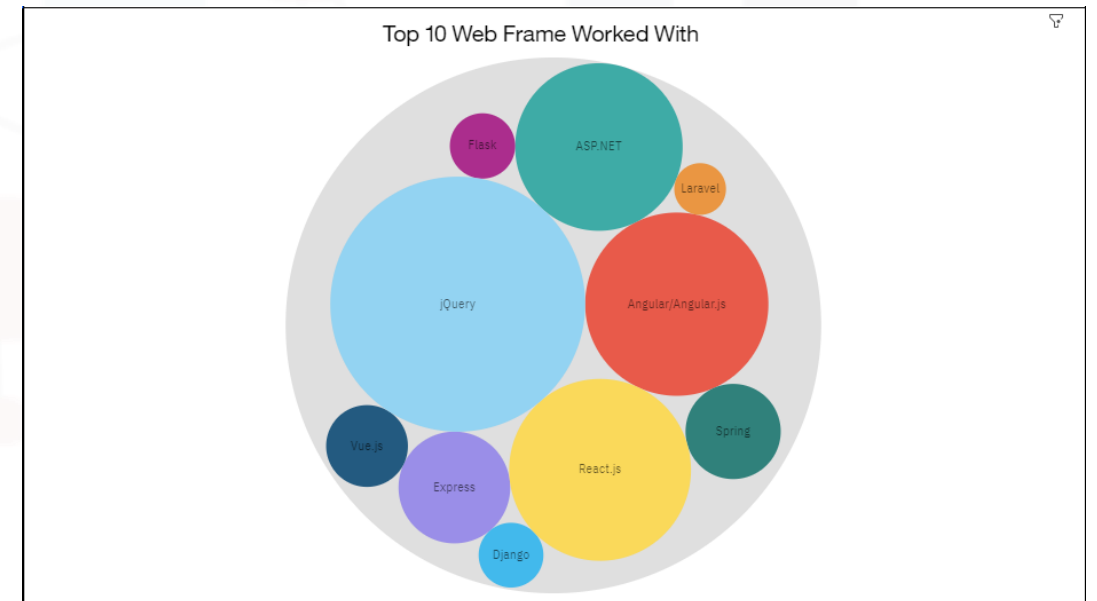

IBM Cognos Dashboard Link:

DASHBOARD - Demographics

DASHBOARD - Demographics

DASHBOARD - Demographics

DISCUSSION

OVERALL FINDINGS & IMPLICATIONS

Findings

- Men forms a large proportion of coding industry
- Most developers are between 20 to 40 years old(especially 24~32)
- Most developers hold a Bachelor's or Master's degree

Implications

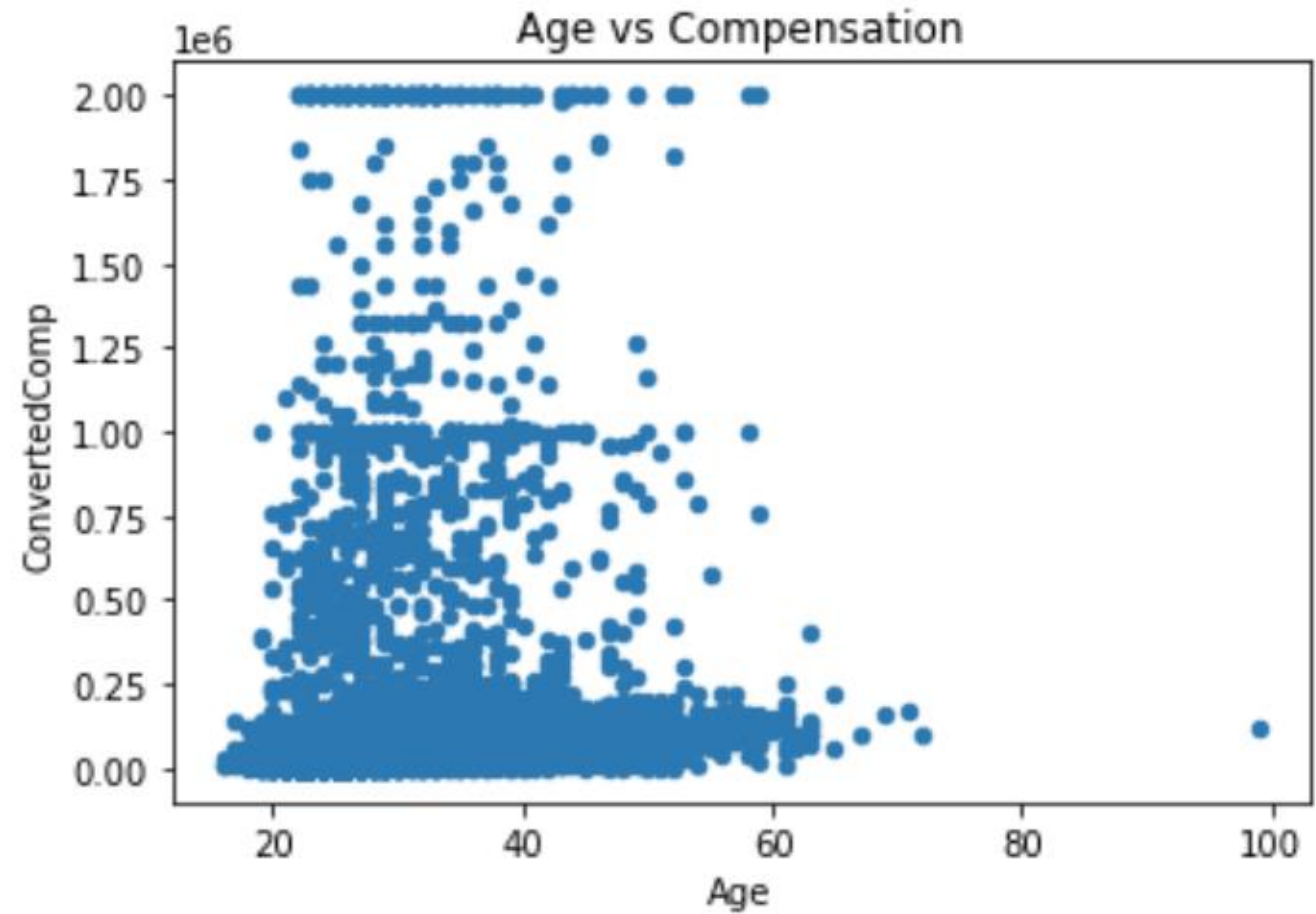

- Industry should make some efforts to balance the gender
- A good age for coding is less than 40 years old, step into management level after 40

CONCLUSION

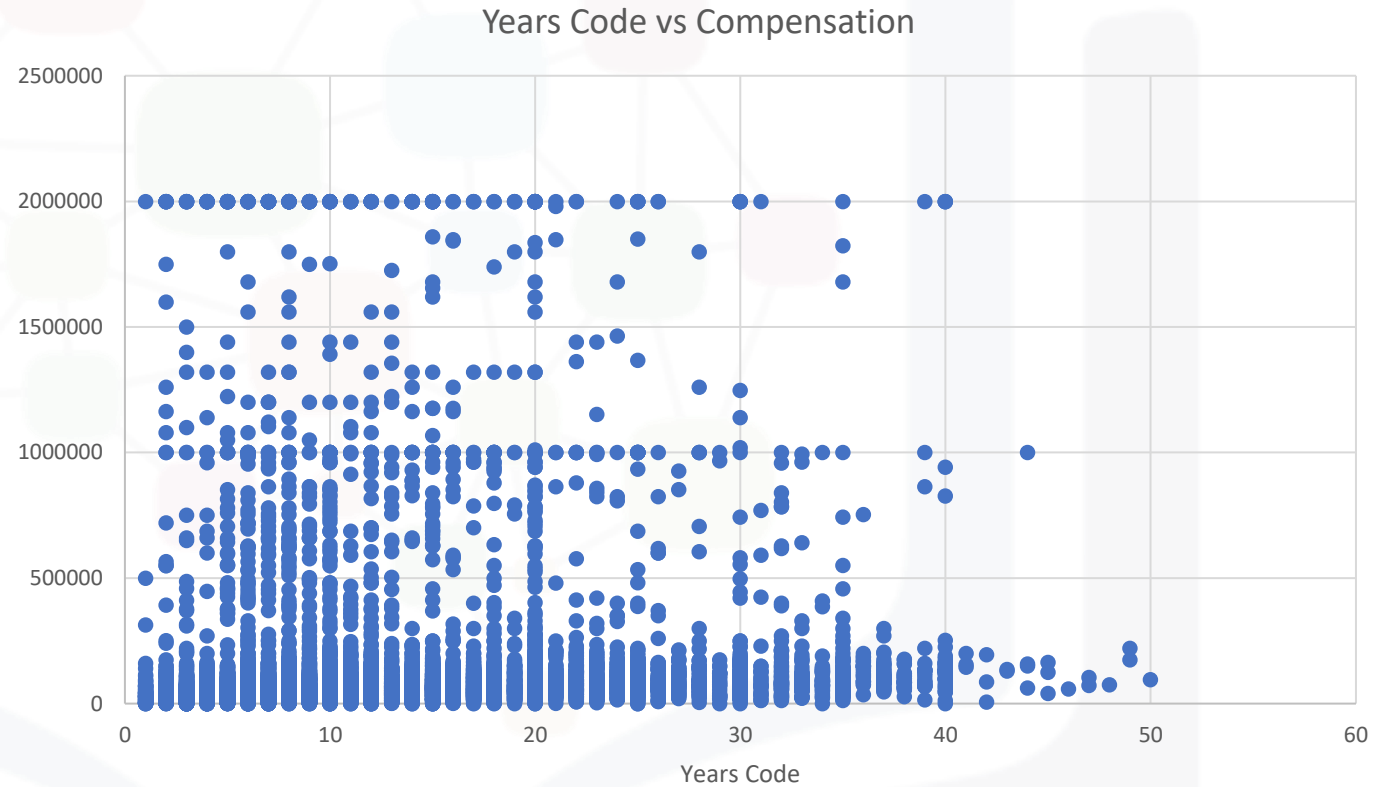

- Python as an open-sourced, easy-to-use language is becoming more competitive
- Cloud based database is turning desirable because of efficiency and mobility
- No-SQL seems more important as data is not just in tabular form
- Windows and Linus are still the most important platform for development
